

All-In-One Label Rewinder/Unwinders for printers with back-feed

The all-in-one rewriter and unwinder was designed to rewind the labels printed by any color printers with the function back-feed on a core with an adjustable diameter from 1.65" up to 4.65".

The plate of this machine was designed so that the printer can be laid on it in order to guarantee correct stability and alignment.

This allows the printer to avoid any possible overturn or interference.

The tension arm position, with reference to the printer's state, is calibrated as it follows:

- When it is in the central position the motor is idle
- When it is down the device rewinds the labels
- When it is up the device unwinds the labels

The obtained roll will have the labels wound on the outside only.

When the roll of labels runs out, the device stops thanks to the contact between the tension arm and the top. An acoustic signal sounds to let you know the roll is finished.

The all-in-one rewriter and unwinder is specific for printers with back-feed like: Primera, VipColor and ToshibaTec.

The all-in-one series is available in two different versions and every model is marked by its own code.

Model R3100

Features

Right "All In One", Rewinder and Unwinder
for printers with back-feed like Primera, VIP, ToshibaTec
Roll Diameter up to 9.85"
Speed 120rpm
Label Width up to 8.27"
Core Size from 1.65" up to 4.65"
Support for heavy and large roll
Power supply 115/18 Vac

Model R3000

Features

Right "All In One", Rewinder and Unwinder
for printers with back-feed like Primera, VIP, ToshibaTec
Roll Diameter up to 9.85"
Speed 120rpm
Label Width up to 4.73"
Core Size from 1.65" up to 4.65"
Power supply 115/18 Vac
