

Small Label Rewinders/Unwinders for the Primera LX400

The Small Label Motorized Rewinder and Unwinder Series has been specifically designed for the Primera Color Label Printer LX400.

The devices have an external power supply and an electronic circuit controls all the functions. When the roll runs out, both the rewinder and the unwinder stop by uttering an acoustic signal.

For the rewinders only there is the possibility to adjust the sense of rotation clockwise and counterclockwise which allows the rewinder to obtain a roll of labels wound on either the outside or the inside.

The tension arm position, with reference to the printer's state, is calibrated as follows:

- When it is in the central position the motor is idle
- When it is down the device rewinds the labels
- When it is up the device unwinds the labels.

The Small Label Rewinders and Motorized Unwinders Series is available in four different versions and every model is marked by its own code.

Model R55
Right "All In One"
Rewinder

Model R50
Right "All In One"
Rewinder

Model R55U
Left "All In One"
Unwinder

Model R50U
Left "All In One"
Unwinder
